ABOUT

I am a QA with a technical background and a passion for ensuring the reliability and quality of software products. I have experience in functional, integration, system, and acceptance testing. My skills include developing test cases and checklists, utilizing test design techniques, web and mobile applications, and API testing. I am detail-oriented, team-oriented, and willing to participate in new projects. I look forward to collaborating and making valuable contributions to the QA field.

EDUCATIONAL TRAINING

February 2022 - June 2022
SkillUp
Quality Assurance Course
Basic knowledge of HTML, API, SQL, CSS
Writing test documentation: Bug Reports (Jira), Test Plan, Check-Lists (Jira), Test Cases

June 2023 - November 2023
QA Course by Vadim Ksendzov
During the QA Course by Vadim Ksendzov, I underwent comprehensive training in the field of Software Quality Assurance. I was introduced to various testing methodologies, including functional, integration, system, and user acceptance testing. Throughout the course, I gained practical experience in creating test cases and checklists to evaluate the functionality and user interfaces of software applications.
Overall, the QA Course provided me with valuable insights and hands-on experience to excel in the realm of software testing, equipping me with the necessary skills to ensure high-quality software products.

December 2024
QA Course by Artsiom Rusau
Software testing from scratch. Theory + Practice

EDUCATION

September 2009 - 2014 December
State University of Railway Transport
Locomotives and Locomotive
Economy
Master's degree

WORK EXPERIENCE

June 2023 to date
I have experience of working in **ITX** company
Conducting UAT and functional tests in the company. Testing web and mobile products.
Creating and keeping text documentation up to date:
- checklists, test cases for desktop and mobile browsers: smoke, critical, regression.
- creating glossary (description of graphic elements for writing test documentation of mobile applications and websites)
- creating Mind map diagrams.
- bug reports (creating, reviews and updates), re-tests.
Ad-hoc testing, exploratory testing, functional testing, smoke testing, localization testing, cross-browser testing, cross-platform testing, UX/UI testing, mobile testing, web testing, Alpha and Beta testing.
I participated in Web and mobile projects, supervised the team, planned, analyzed and distributed tasks. I collected results, analyzed data and prepared reports. Held meetings, resolved internal team issues and troubleshoot problems. Compiled and updated test documentation, and always completed tasks on time and with full commitment. I am an excellent team player, actively listening and understanding team members.
These projects provide valuable experience for further development. I have basic knowledge of Python. I continue to study programming languages.

HARD SKILLS

The tools I use in my work include: VSCode, PyCharm, GIT, Android Studio, Linux Terminal, DevTools, Charles, Fiddler Postman, MySQL , and JMeter.

LANGUAGES

Ukrainian - native
Russian - native
English - Intermediate (in progress)

INTERESTS

I like football, travel, spending time with friends, I go to the gym, love scuba diving, and skydiving
